**WHAT
I
NEED**

nessy.com

For ROSS

WHO IS NESSY?

Nessy Learning is a dynamic ed-tech company run by two dyslexic people: Tiffany James and her husband Mike Jones.

Nessy has a small team of dedicated people with a passion to change educational outcomes for children with dyslexia. We believe in the importance of early intervention following the Science of Reading, and that children should use programs that provide structured literacy.

The goal of the company is to make effective instruction available to all children at an affordable, low-cost, and to help educators to identify and support children with dyslexia.

THE ILLUSTRATOR'S STORY

Leah Heming is an illustrator, art director, curator and nature guide. She has collaborated with **Nessy Learning** on books, illustrations and animations since 2014.

Leah has illustrated a dozen children's picture books that have been published around the world. She has also art-directed part of popular children's TV series 'Driver Dan's Story Train' and worked as a concept designer on the series 'Numtums'.

In her spare time, Leah studies permaculture, plants, animals, ecology and ancestral skills. She is starting to combine her love of nature and illustration by creating fun and interactive nature-guided walks for all ages, with the hope to inspire new generations to protect the planet.

THE AUTHOR'S STORY

Tiffany James has dyslexia and dysgraphia and is the mother of children with dyslexia. She is the founder of The Reading Center in Texas, and Director of Educational Development for **Nessy Learning**.

Tiffany has been an educator for more than 25 years. Inspired by the love of teaching and early literacy by her grandmother Charlene Gnagy, Ms. James founded a tutoring practice in Texas in 2003 to help struggling readers.

She is a former kindergarten teacher and reading specialist, as well as a certified reading tutor, qualified dyslexia screener, and a dyslexia specialist. She now devotes her time to raising dyslexia awareness, advocacy for children through charitable endeavors, and to her work at **Nessy Learning**.

CHAPTER 1

**What is it Like
to have dyslexia?**

I have **DYSLEXIA**

Dyslexics have a different way of thinking.

seeing
the **big**
picture

recognizing
patterns

thinking
creatively

thinking
in
pictures

problem
solving

Our brains are wired in a different way.

We like learning in different ways.

playing

making

moving

This can make school very hard.

Most schools are not set up
to teach dyslexic kids very well.

Reading and spelling can be hard,

especially if you are not being taught
in the way you learn.

Having dyslexia does not mean
that you are dumb,

or that you are lazy.

In fact dyslexics have to work very hard to complete the same amount of work.

Sometimes people in school say I am

dumb

stupid

lazy

and teachers say...

try
harder

and **pay**
more
attention!

What they don't understand is

I am
not
~~stupid~~

I am
not
~~Lazy~~

I am already working very hard.

Sometimes it's hard for me to understand
what you are asking me to do.

Sometimes it's hard for me to remember things in my working memory without jumbling them up.

Sometimes it's hard for me to process what you are saying because you are speaking too fast.

Sometimes it's hard for me to spell the words
because I am not aware of the sounds
that make them up.

I just can't remember what order
the letters should go in for tricky words,
or even which letters to use.

All of this makes my brain work very hard.

It is exhausting!

At the end of a lesson,
I have no more energy to spare.

So please don't tell me to stop being lazy,
work harder or to just remember it.

Lazy

work
harder

Just
remember
it

After I have tried so hard,
this just hurts my self-esteem.

It makes me feel dumb.

It can crush my spirit.

CHAPTER 2

**What we are
good at**

Our brains are uniquely wired.

Research has found that dyslexics have bigger brains.

right
hemisphere
is bigger

We can be

great

or even

"super"

at lots of things.

That's why so many of us have become

artists

engineers

designers

craftsmen

Some of us are great at ideas
and getting things done,
and have become

entrepreneurs

and

business owners

Some of us are great with people,
and have grown up to be

teachers

doctors

vets

counselors

and

Some of us have a good kinesthetic sense,
and have become

dancers

athletes

gymnasts

But DO
DYSLEXICS
have

⚡ SUPERPOWERS ?

When **DYSLEXICS**
are **given**
the opportunity
to **USE** **their** **TALENTS**

they can turn their **SKILLS**
into

Karate

building

with

tools

Singing

Soccer

pottery

painting

twirling

people or animals

being kind to

baking

biking

sculpting

Swimming

playing

guitar

drawing

It's important to think about this question...
What am I good at?

CHAPTER 3

**Dyslexics
who have found their
superpower**

successful
DYSLEXIC
Kids
around
the world

**Your superpower
is what you
are good at.**

These dyslexic kids have found
their superpowers.

They may have to work hard in school
in reading, spelling, writing or math
but they have found
the things they are super at.

Dyslexic children turn into dyslexic adults.

There are successful dyslexics doing all kinds of jobs as grown-ups.

There are teachers and professors, doctors and nurses, builders and construction workers, electricians and engineers, artists and actors.

There are lots and lots of dyslexic entrepreneurs and business owners.

The 6 people on these next pages were chosen because they are dyslexic adults who through their work, are helping dyslexic kids.

successful
DYSLEXIC
adults

IÑAKI MUÑOZ

federation president

Founder of
the
**Spanish
Federation
of
Dyslexia**

President of
the
**Organization
of
Specific Learning
Difficulties
(OIDEA)**

Iñaki has ADHD and dyslexia.

He helped his mother open centers for dyslexic children all over Spain.
He works with the European and South American governments to bring better
dyslexia teaching to children who speak Spanish and Portuguese.

ENID WEBB

dyslexia specialist teacher

Presenter
of the show
and
podcast
'Dyslexia Coffee
Talk'

Dyslexia
Advocate
and
Autism
Specialist

Enid is dyslexic and dysgraphic. She helps dyslexic children in California and Nevada get the teaching and support they need from their schools.

She is also a host of the show called 'Dyslexia Coffee Talk'.

The show teaches people about dyslexia. It is on every Saturday morning.

LEDERICK HORNE

poet
and
published
author

Advocate
for
children with
dyslexia
and
ADHD

LeDerick was diagnosed with learning disabilities as a child. He is an inspirational speaker and a supporter of people with special needs. He has even spoken at the White House and the United Nations!

HEIDI GREGORY

dyslexia activist

Founding Member
of
Light it Red
for
Dyslexia
Awareness
Australia

Founder
of
Dyslexia
Victoria
Support

Heidi is a dyscalculic mom of two teenage dyslexics. She works with families, politicians, and organizations in Australia to bring evidence-based teaching to schools in her country.

OLADOYIN IDOWU

interior & set designer

**Founder
of
One Word
Africa**

**Dyslexia
Awareness
Advocate
and
Speaker**

Oladoyin is dyslexic. She is the founder of One Word Africa, a NGO (Non-Governmental Organization) that works to teach people about dyslexia. One Word Africa also works with the government to help create dyslexia friendly schools for kids in Nigeria.

TOM PLANT

comic book artist & animator

**Artist
and
Writer**

**Creative
Director
of
Nessy
Learning**

Tom is dyslexic. He works with the teachers at Nessy and creates fun videos and worksheets that help dyslexic kids all over the world learn to read and do math. He leads the whole team of artists, video makers, and animators at Nessy Learning.

CHAPTER 4

What do
I need?

I need these
THINGS
from my
TEACHERS.

Please give me
the opportunity
to show
what I
KNOW.

Please don't ask me to guess at words.

Teach me how to read them.

I need to be explicitly taught the rules
of English to learn to read.

phonology

phonics

syllables

grammar

morphology

vocabulary

spelling

comprehension

I do need **to be taught** to read and spell.
After that, I may need help to learn strategies to
work with any memory, organization, planning,
and writing difficulties.

While I love to be read to,
just reading to me and giving me books
will not teach me how to read.

I need you to show me how language works,
to learn to read and spell.

Silent reading doesn't help me improve my reading skills and choosing "baby" books embarrasses me in front of my classmates.

Please do not count off for spelling incorrectly on work other than spelling tests.

SCIENCE

egg

caterpillar

chrysalis

butterfly

~~EG~~

~~BUTERFLI~~

~~CATERPILER~~

Life
cycle

0
/ 10

~~CHRISALIS~~

I need my spelling lists to be short and
to follow the rules of English that I am learning.

Please do not ask me to copy from the board.
I lose my place from looking up and down.

I usually cannot remember

a whole word.

I have to try to remember one letter
or two letters at a time,

then write them on the paper.

When I look up again I have lost my place!

This takes so much time and is so much work
that I forget what I was trying to copy
in the first place.

All of my energy
has gone into **copying**
instead of **learning**
the information.

I need what is on the board to be printed out onto a sheet of paper to keep next to me.

My working memory is not as strong
as some of my friends. I cannot hold
as much information in my head at one time.

Please do not ask me to read aloud to the class.

Someday, when I am feeling confident enough,
I may volunteer.

I need extra time for tests and for classwork.

I can understand much more than I can read
on my OWN.

I need audiobooks for ear reading.

Audiobooks are good for reading contests,
silent reading or D.E.A.R. time.

Help me choose titles that highlight text on the
screen as I ear read.

Please do not give me more homework
than I can do in 30 minutes.

It takes me longer to complete
the same amount of work.

I need time to spend with my family and friends.

I need time to play and to just relax.

I need time to find out what I am good at
and love to do.

CHAPTER 5

What I
don't need

I do not need whole language
or Balanced Literacy.

Dyslexic kids need

structured

language teaching.

I do not need ineffective treatments
that do not follow the Science of Reading.

cranial manipulation

auditory or brain

"retraining"

colored overlays

behavioral optometry

flashing lights

or "dyslexia glasses"

There is no quick fix for dyslexia.

Dyslexia doesn't need to be fixed.

I do not need to be cured.
Dyslexia is not a disease.

Dyslexia is part of who I am and I am wonderful!

I am dyslexic,
I am smart,
I am hard working.

DYSLEXIA

I am discovering
my superpowers.

PRAISE
for
NESSY LEARNING

PRAISE FOR NESSY LEARNING by parents

"Nessy was the single most valuable product I could have come across to aid in my son's reading success. It allowed Mikey to work independently after lessons to build self-esteem. It was responsible for 100% of our reading success."

Gail Camenzind,
homeschool parent

"I think you do an amazing job on so many levels ... increasing awareness and support with your various educational offerings. It has helped me so much with my 8 year old son and given me knowledge to both understand what he goes through every day and also to stand up for his education at school . Thank you to all at Nessy."

Sonia Hands

"My children both use Nessy for their home-schooling. I want to start by saying that this is one of the most outstanding pieces of software out there for homeschool children. My oldest son is dyslexic, and gets great benefit from it, as well as my youngest, who is not dyslexic."

Eric Foote, homeschool parent

Crystal Lovato

"When starting your program, my daughter read at a beginning 2nd grade level, two years behind her actual grade level. In less than a year, my daughter is now reading at a 5th grade level, her current grade level. She was able to learn from your program what the OG Tutors at her public school had failed to teach in 3 years. I have a very happy and proud little girl."

"Nessy. I found your page a couple of years ago, I live in Ireland. Your page has helped me so much in learning how to help our daughter over the years and I just wanted to say thank you so much for all your wonderful information."

Glynis Croke

Pamela

"I can't say enough about Nessy. Our son is in love with it! I actually have to pull him away from it because he would sit there for hours if I let him. If anyone is at all on the fence about purchasing Nessy, I wouldn't hesitate to purchase it if your child is dyslexic or not."

PRAISE FOR NESSY LEARNING by teachers

"The children enjoyed Nessy! They are still chanting Nessy as they go down the hall. I can't wait until Sept. when I can do projects with the entire First Grade!

Thank you again for all of your help. I am not very good with computers and you made it easy!"

Debbie Munn

"Nessy is a wonderful, fun resource for dyslexia or anyone who finds reading and spelling tricky. It has strategies to support short term memory and shows you how to read and spell words using a phonetic program. There are worksheets, assessments and target setting. I absolutely rate this program."

Amanda Wright

Joan Case

"I have just been assessing a quiet little girl with severe dyslexia. After the session using the Nessy Learning Program, she was smiling and giggling and asking what was next! So much so that the SENCo asked the Head Teacher "could I order a copy for her asap?" as they are desperate to help her."

"Thank you so much for allowing us to use the program on a trial run to test out. The results have been no less than amazing and the students absolutely loved what you have created! Thank you tremendously as we could not have experienced these reading gains in such a short amount of time without your program!"

Shanara Hawkins,
Dyslexia Specialist and IDA board member
